INTRODUCTION

Today's world, the number of migration increases enormously basically as the result of globalizing world where every day wars, ethnic-religious and cultural clusters and finally economical manipulations. There are two major reflections of this unstable movement:

- 2. Some of us have lost their home, land, country and force to write their own new history.*

Whatever our background, profession and life status the following terms became in to our daily life: Inclusion, discrimination, integration, collaboration, culture, stereotypes and others.
